This email is to express my opposition to changes proposed by Rocky Mountain Power in Case 14-035-T08. Rocky Mountain has constantly given unfair treatment to retailers in the sale of CFL and LED lamps. They have always treated the retailers to a better program than the electrical distributors. This new proposal is even more unfair than previous programs. They seem to want all incentives to go thru retailers.

The new proposal is not fair and maybe not legal. They are eliminating the electrical distributors from that market. If we can't offer the rebates how are we going to compete. Consumers should have the opportunity to purchase these products from the source they feel offers them the best value. The other problem that seems obvious is, they have no way to determine what utility company is supplying the power to the customer. Rocky Mountain should not have the power to determine how these items are to be supplied. Do not let Rocky Mountain give more advantages to one market segment.

Thanks

Mark Waters
